

Jakarta EE Spec Committee - August 19th, 2026

Attendees (present in bold):

Kenji Kazumura - Fujitsu - Takahiro Nagao

Emily Jiang - IBM - **Tom Watson**

Dmitry Kornilov - Oracle, **Robert Patrick**

Andrew Pielage (chair) - Payara

David Blevins - Tomitribe - Jean-Louis Monteiro, Cesar Hernandez

Ivar Grimstad - PMC Representative

Arjan Tijms - Omnifish OU - Elected Participant Member Representative

Werner Keil - Committer Member

Jun Qian - Primeton Information Technologies - Enterprise Member

Zhai Luchao - Shandong Cvicse Middleware Co. - Enterprise Member

Guest - Jakarta EE 12 co-release coordinators: **Jared Anderson, James Perkins**

Eclipse Foundation: Tanja Obradovic

Past business / action items:

- Approval is requested for the minutes from the August 5th, 2026 meeting as drafted - **Approved**

Agenda:

- [Jakarta EE 12 Update](#) [Jared Anderson]
 - [Dashboard](#)
 - [Platform Minutes](#)
 - CDI 5.0 in review
 - Still aiming for fourth quarter for Core Profile

- GlassFish has a new M3 release, which includes new milestone releases e.g. Faces
- Ongoing tracking [spreadsheet](#) of specifications progressing through the [JESP](#) specification version [lifecycle](#)
 - Check on Progress review for Jakarta Config
 - Ondrej is aware of the need for a progress and is looking to submit one after the summer holidays:
<https://www.eclipse.org/lists/config-dev/msg00275.html>
 - Check on progress of [Termination Review](#) for Jakarta RPC
 - *Carry over from previous call:*
 - Email sent to EMO and PMC, and response given:
<https://www.eclipse.org/lists/jakarta.ee-spec.committee/msg03739.html>
- EFSL version: the latest version is 2.0 [Emily]
 - Some specs still uses 1.0
 - We should tell the Jakarta EE platform team that all of the updated specs need to use 2.0
 - 1.1 is good enough, but no harm in 2.0
 - They do need to move off of 1.0 - we should fail reviews on this
 - Emily to send email
 - If linking to a license, you should link to a specific version, rather than the versionless URL (as this is always the latest)
 - E.g. don't link to <https://www.eclipse.org/legal/efsl/> - link to <https://www.eclipse.org/legal/efsl-1.1/>
- Issue [#74](#) - TCK challenge automatic acceptance - [Andrew Pielage]
 - Check in on progress of pull requests
- Issue [#85](#) - Document Jenkins Maven Publication Jobs [Emily Jiang]
 - *Carry over from previous call: Needs to be brought up in the Platform call and/or poke projects leads via email. Check in on any updates to [email](#). Add a checklist item to the spec review checklist*

- Added to the spec review checklist via a PR and Ivar merged it. I have started using it to review Jakarta CDI 5.0 and the team has done the update as a consequence.
 - <https://github.com/jakartaee/specification-committee/pull/90>
 - We also need to update the checklist in the specifications template:
https://github.com/jakartaee/specifications/blob/master/.github/PULL_REQUEST_TEMPLATE/pull_request_template.md
- Issue [#89](#) - SHA512
 - Discuss any reasons why we shouldn't allow
 - Nobody is aware of any reason why not
 - Pull request templates need updating
 - Any documentation where we mention it needs updating:
 - TCK Process guide:
<https://jakarta.ee/committees/specification/tckprocess/>
 - Any others where it's mentioned under
<https://jakarta.ee/committees/specification/>
 - Maintained in GitHub here:
<https://github.com/jakartaee/jakarta.ee/tree/src/content/committees/specification>
 - The promotion scripts where we generate the SHA-256 will also need updating: <https://github.com/jakartaee/specification-tools/blob/master/promotion/>
 - Requesting an owner
- Issue [#48](#) - Dependency Injection Name
 - Check for any response or update by anyone if anything needs doing, and potentially close if not
 - Everything seems to be correct as far as we can tell:
 - <https://github.com/jakartaee/inject/blob/master/src/main/java/module-info.java>: module jakarta.inject
 - <https://github.com/jakartaee/specification-committee/blob/master/names.adoc>: Says the module name is jakarta.inject

- Issue closed
- Promoting TCKs is a collective effort [Ivar Grimstad]
 - *Carry over from previous call*
 - *Probably worth doing a refresher course when there are more members present*
 - *Can we also document them in our GitHub repo?*
<https://github.com/jakartaee/specification-committee>
 - *Tools repository where the scripts exist:*
<https://github.com/jakartaee/specification-tools/tree/master/promotion>
 - Timeboxed demonstration when we have time and enough members present
 - Todo (ivar): Add a link to the CI instance and [job](#) with a couple of bullet points explaining it
- Issue [#55](#) - TCK Archive Format
 - Check for any feedback
 - On hold for now. Waiting for concrete ask from MicroProfile
- Review other [open issues](#):
 - Determine which issues to label as “enhancement” and add to our [board](#)
 - Close issues which are no longer relevant or have been dealt with
 - Issue [#44](#)
 - Those present on the specification committee call today believe this issue is no longer relevant: we will look to close it on the next call (2nd September) if nobody provides an update on the issue stating that it is still relevant
 - Issue [#43](#)
 - This is nominally now standardised - most specifications are using the same format now.
 - What's unclear is whether this is documented anywhere, and if a need to have a written standard is required.
 - Do we need to perform a review?

- Those present on the specification committee call today believe this issue is no longer relevant: we will look to close it on the next call (2nd September) if nobody provides an update on the issue stating that it is still relevant
