 - Discuss any further amendments and actions
 - PRs merged - issue complete
- Promoting TCKs is a collective effort [Ivar Grimstad]
 - Carry over from previous call
 - Probably worth doing a refresher course when there are more members present
 - Can we also document them in our GitHub repo? <https://github.com/jakartaee/specification-committee>
 - Tools repository where the scripts exist: <https://github.com/jakartaee/specification-tools/tree/master/promotion>

- Timeboxed demonstration when we have time and enough members present
 - Todo (ivar): Add a link to the CI instance and [job](#) with a couple of bullet points explaining it
- Issue [#55](#) - TCK Archive Format
 - Check for any feedback
 - On hold for now. Waiting for concrete ask from MicroProfile
- Review other [open issues](#):
 - Determine which issues to label as “enhancement” and add to our [board](#)
 - Close issues which are no longer relevant or have been dealt with
 - Issue #89 - SHA512
 - Is there any reason why we shouldn’t allow this?
 - Issue #48 - Dependency Injection Name
 - Nobody is sure what is meant by this. A question has been asked, and we will close next call if we do not get a response.
 - Issue #45
 - This seems to have been resolved? There was a comment asking if it could be closed two years ago.
 - Closing
- <https://github.com/jakartaee/specifications/pull/918>
 - A question was asked of whether we should allow this in its current state where three milestones are being published (M1, M2, and M3)
 - Do we only want to publish the latest?
 - Are we happy to just tidy it up when the final release is published?
 - Ivar to comment on the pull request that we don’t normally include all milestones, but it’s fine for now (while in development).
